

# 2" Square Operating Nut for Butterfly Valve Types 563, 567, 578

## Standard Features

- **Size**  
2"-12"
- **Material**  
Anodized aluminum
- **Compatible Valves**  
563, 567, 578
- **Operation**  
90°, or multi-turn with gear operator

← Example shown: Type 567  
butterfly valve with Square  
Operating Nut and tool.

## 2" Square Operating Nut

Size	Part no.
2"-3"	306 515 0001
4"-5"	306 515 0002
6"-8"	306 515 0003
10"-12"	306 515 0004

## General

The 2" square operating nut is available on the Type 563, 567, and 578 butterfly valves. The nut is mounted on top of the valve and takes the place of the standard handle or gear operator. The nut can also be used in conjunction with a gear operator. It allows for remote operation of the butterfly valve when it is below ground, in a well, under grating, or in a vault. Using this feature requires a tool that accommodates the nut. Although the 2" connection to the valve is always the same, the tool is often made in various lengths.
