General

The butterfly valve handle extension from Georg Fischer offers a level of versatility often required for the ever increasingly complex water systems of today. Available in custom lengths of up to 12 feet, the extension is ideal for applications where the valve is difficult for an operator to access. In manual versions a lever or hand wheel may be used. The extension is also well suited for applications where the valve might be temporarily submerged. In cases such as these, the actuator is elevated away from the flooded area allowing operation and preventing damage. Please contact customer service for ordering information.
