

ChlorFIT®

Solvent Welding Kits

The two-step solvent welding kits from GF Piping Systems are the ideal choice for joining the ChlorFIT Corzan piping system in commercial water applications. This solvent fusion process joins pipe and fittings, creating a uniform homogeneous connection. The end result is a reliable robust connection designed for and supported by GF Piping Systems.

Features

- Joins ChlorFIT Schedule 80 Corzan® CPVC pipe and fittings
- Made in the USA
- Creates a strong leak-tight bond
- Kits are available in two sizes: ½" to 3" and 4" to 6"
- Correct formulation of Primer and Solvent Cement
- UV optical brightener to allow identification of solvent welded joints
- Correct ratio of Primer to Solvent Cement
- Includes correct size applicators and selector chart
- Detailed instructions included
- Additional documentation and instruction videos available online
- Complies with ASTM F493

ChlorFIT Solvent Cement Kit ½" – 3" - Two Step

Size (inch)	Part No.	Description	SP
1/2" - 3"	150 298 201	1 can 32oz Cement, 1 can 16oz Primer, 2 small applicators, 2 medium applicators, 2 large applicators	6

ChlorFIT Solvent Cement Kit 4" – 6" - Two Step

Size (inch)	Part No.	Description	SP
4" - 6"	150 298 202	2 cans 32oz Cement, 1 can 32oz Primer, 2 applicators, 2 applicator heads	6
